PROGRAMME SELECTOR

Choose The Right Alpha Libra Commission Pathway

Alpha Libra has two separate commission pathways. They are related because both support growth, but they pay for different outcomes and should not be mixed.

Pathway	Best for	What is paid	How to qualify
A. Verified User Acquisition Agent	Disciplined community builders who can onboard real users daily.	Milestone payouts for approved verified users.	Users must be real, unique, tracked, and signed up to at least 2 Alpha Libra brands.
B. Global Revenue Partner	B2B sellers, creators, ambassadors, association connectors, and strategic introducers.	Commission or approved deliverable pay tied to verified commercial value.	Revenue, pilots, tracked referrals, approved content, or founder-approved introductions.

Choose Pathway A if

- You can reach real users every day.
- You are comfortable explaining several app brands.
- You can report accurately and avoid fake or duplicate signups.
- You want a short, milestone-based campaign role.

Choose Pathway B if

- You can sell, refer, create content, open partnerships, or introduce decision makers.
- You understand revenue-based commission.
- You can work with tracked links, clean claims, and professional follow-up.
- You want a broader commercial partner path.

Important: Pick one primary path first. A person may be considered for another path later, but only after separate approval, separate tracking, and separate terms.
